The new nutrition science project

John Coveney
John Coveney is currently the Coordinator, Graduate Studies in Primary Health Care, Faculty of Health Sciences, Flinders Medical Centre, Adelaide. His main areas of research are public health nutrition, food habits in families, and environment and food supply. Current research interests include the politics of food and health promotion, which involves both the examination of the social and cultural determinants of food choice, including efforts to change individual and community eating habits, and food regulation, legislation, new technology, and food policy. Before joining Flinders University, John worked in clinical and public health nutrition in the UK, Papua New Guinea, New South Wales and Western Australia. He holds a PhD from Murdoch University, Perth, as well as a Masters degree in Health Personnel Education and a Bachelors Degree in Nutrition and Dietetics (UK).

Dr Geoffrey Cannon - Brazil
Geoffrey Cannon is the Director of Science and Policy for the World Health Policy Forum. He is co-convenor of the New Nutrition Science project, a joint initiative of the Forum and the International Union of Nutritional Sciences. A British citizen, he lives in Minas Gerais, Brazil. He is an associate editor of Public Health Nutrition, for which he writes an outspoken column, 'Out of the Box'. He is an advisor to various US agencies and also to the World Cancer Research Fund. He was WCRF Director of Science in the 1990s and was responsible for the groundbreaking report 'Food, Nutrition and the Prevention of Cancer: a Global Perspective'. He has a background as an award-winning campaigning journalist and author of best-selling books including 'DiETING MAKES YOU FAT'.
